## Quality Policy

The quality policy of MÁLAGA AEROSPACE, DEFENSE AND ELECTRONICS SYSTEMS, S.A., is to be a leader in services of electronic manufacturing and integration of electromechanical systems, providing our customers with a complete solution, from the materials procurements and prototypes manufacturing, until the final assembly and testing.

Our vision is to strengthen our position in the defense and aerospace markets, through the use of state-of-the-art technology, and "Mission Assurance" processes, to ensure the complete success of the programs.

By the foregoing, MÁLAGA AEROSPACE, DEFENSE AND ELECTRONICS SYSTEMS, S.A., acquires the following commitments:

- Continue to be a customer-focused company, based on fulfilment of requirements, relationships and solutions, exceeding expectations of customers, employees, society, shareholders and rest of interested parties.
- Be the best valued supplier of defense and aerospace systems, through the best professionals and the latest technology.
- Continually comply with statutory and regulatory requirements.
- Promote the responsibility of everyone in Quality, productivity, environmental protection and the safety of employees and the products.
- Use the Six Sigma process to continuously improve Quality management, product, cost and technology, pursuing excellence
- Maintain an ethical and moral conduct at all times.
